

kindyhub™ simply connects parents with their early childhood centre.

Parents receive updates from their centre via email or our app

Kindyhub is secure web-based software which enables educators to capture children's learning, linking to Early Learning Frameworks and Standards. Our intention is to engage parents and maximise communication, in-turn improving children's learning outcomes.

Our parent app gives parents around the clock access to view their child's information (photos, stories, & achievements) and allows quick and easy communication (parent feedback, medical alerts, newsletters, reminders, events, menus etc). Parents have a better knowledge of how their child is developing, giving the opportunity of further involvement to extend on their child's learning.

Features

Learning - All Daily Reports & Observations are received.

Photos - Parents can access photo's of their child

Communication - Parents receive news, messages & notices from their centre

Events - Stay up to date with special events

Feedback - Send direct feedback to help improve the app

Secure and private using industry standard SSL security
